

## Martin Lynch & Sons have been appointed world wide distributor for Wonder Wand aerials and accessories – July 2007.

The Wonder Wand antennas are portable QRP rig mounted antennas which are extremely simple to use and a cost effective portable antenna for the Yaesu FT-817, FT-857, FT-897, Icom IC-703, IC-706, IC-7000, etc. providing MF to 70cm coverage.

### Key Features:

- Full Coverage from 40m to 70cm (7MHz to 430MHz).
- Rear Access to Band Switch.
- Simple & Easy to Use.
- Compact Design – folds down to 300mm.
- Power Handling up to 40W PEP.

The **Wonder Wand** provides a simple and affective means of lightweight performance for portable HF amateur radio when compared to antennas supplied normally with the original radio. The Wonder Wand has been engineered in the UK to be as compact as possible without compromising performance.

### HF Operation:

Connect the Wander Wand to your rig directly using the SO-229 socket on the rear of the radio. Once attached, extend the telescopic whip to it's maximum length and then position the whip from any obstructions and of course yourself!

Using the rotatable knob at the rear of the Wonder Wand to select the desired band for operation between 40m – 6m (7MHz – 50MHz).

### VHF/UHF Operation:

Connect the Wander Wand to your rig directly using the SO-229 socket on the rear of the radio. Once attached, extend the telescopic whip to it's maximum length and then position the whip from any obstructions and of course yourself!

For use on VHF and UHF operation (70MHz – 430MHz) select the V/UHF band and adjust the length to obtain best VSWR.

We are looking for dealers for this product, email: [sales@hamradio.co.uk](mailto:sales@hamradio.co.uk) for further information.
